Project Development Phase

Code-Layout, Readability and Reusability

Date	3 November 2023
Team Id	NM2023TMID03725
Project Name	Create a Google My Business profile

Code Layout:

The code for creating a Google My Business profile for a soap shop should be well-formatted and easy to read. This means using indentation, white space, and comments to make the code more readable and maintainable.

Readability

The code should be easy to understand, even for people who are not familiar with the programming language. This means using descriptive variable names, function names, and comments.

Reusability

The code should be written in a way that can be reused to create multiple Google My Business profiles for soap shops. This means using functions and classes to encapsulate the code.
